Subject: FW: AR - Area 40 Soil Gas Step Out Location Figure

Hi Lynn,

Per our discussion last week attached are the conversations re: the soil vapor sampling locations relative to Village 1 (northern residential development).

I never received any feedback from Chris on the data gaps as identified below. Chris did say that AR was not going to release the Soil Gas Step out location figure dated 1/8/2015. I will forward that correspondence. Thanks

-Pete

Hi Chris,

This is understood. The nice thing about the other figure is it provides the data relative to the planned development for basic illustration purposes. I'd still like to have that figure if you don't mind.

Looking at figure 4.1-3 I'm not sure why sample 37B SP25 was not sampled (NS) for TCE at less than <10', but data is provided for the 10-20' range.

-Pete

Hi Peter – That map is not accurate. The locations are hand placed rather than accurately positioned via coordinates in GIS. The accurate information can be found on RI Figures 4.1-3 and 5-8. Chris

Subject: [EXTERNAL] AR - Area 40 Soil Gas Step Out Location Figure

Hi Chris,

As you were scrolling through the documents during yesterday's meeting I noticed a figure dated 1/8/2015 showing the revised soil vapor step out sampling locations with proposed land uses overlayed in color. Can you please forward me this figure? I found it somewhat interesting and informative considering the current state of the Site. Thanks
